3M Double Coated Removable Foam Tape with Adhesive 100 4658F

Product Description
3M™ Double Coated Removable Foam Tape 4568F is a clear, double coated acrylic foam tape that removes cleanly from many surfaces. 3M™ Adhesive 100 is a firm acrylic adhesive system that offers high ultimate bond strength, good temperature resistance, solvent resistance and static shear holding power.

U.V. Resistance: Excellent resistance to direct exposure to sunlight or other sources of ultraviolet (U.V.) light.

Solvent Resistance: No apparent degradation when exposed to splash testing of most hydrocarbon solvents.

Shelf Life: 24 months from date of manufacture when stored in original cartons at 70°F (21°C) and 50% relative humidity.

Available Sizes

*Standard Stock Sizes:
1/2 in. x 27 yds. (12 mm x 25 m)
3/4 in. x 27 yds. (19 mm x 25 m)
1 in. x 27 yds. (25 mm x 25 m)

Slitting Tolerance: ± 1/32 in., ± 0.031 in. (± 0.8 mm)

Maximum Width: 46½ in. (1.18 m)

Maximum Roll Length: 175 yds. (160 m)

*Questions regarding other possible tape sizes and shipping quantities should be directed to either your 3M sales representative or 3M's customer service at 1-800-362-3550.
**Application Techniques**

- Bond strength is dependent upon the amount of adhesive-to-surface contact developed. Firm application pressure helps develop better adhesive contact and improve bond strength.
- To obtain optimum adhesion, the bonding surfaces must be clean, dry and well unified. Typical surface cleaning solvents are isopropyl alcohol (rubbing alcohol) and water or heptane. **Note:** Carefully read and follow manufacturer’s precautions and directions for use when using solvents.
- Ideal tape application temperature is 70°F to 100°F (21°C to 38°C). Initial tape application to surfaces at temperatures below 50°F (10°C) is not recommended because the adhesive may become too firm to adhere readily. However, once properly applied, low temperature holding is generally satisfactory.

**Design Considerations**

- As a general rule, four square inches of tape should be used for each pound of weight to be supported in static load. More or less tape may be required depending upon the particular application. User evaluation is, therefore, required to determine optimal tape usage.
- Care should be used when bonding to surfaces with very low internal strength such as painted plaster board, fabric or cloth, wallpaper, blown vinyl, etc. since delamination of that surface may occur.
- Care should also be taken with wood veneers and highly polished wood as very glossy surfaces may leave an image when the tape is removed.

**Removal Techniques**

- For rigid surfaces, lever or pry apart the substrates to break the bond.
- For flexible surfaces, peel back, slowly to ensure clean removal.
- To remove tape from substrate, pull back corner and peel off quickly.

**Application Ideas**

- Signs
- Smoke Alarms
- Point of Purchase and other Displays
- Holding Electronic Accessories
- Dispensers
- Nameplates
- Exhibitions
- Air Fresheners
- Picture Frame Tabs

**Important Notice**

3M MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. User is responsible for determining whether the 3M product is fit for a particular purpose and suitable for user’s method of application. Please remember that many factors can affect the use and performance of a 3M product in a particular application. The materials to be bonded with the product, the surface preparation of those materials, the product selected for use, the conditions in which the product is used, and the time and environmental conditions in which the product is expected to perform are among the many factors that can affect the use and performance of a 3M product. Given the variety of factors that can affect the use and performance of a 3M product, some of which are uniquely within the user’s knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user’s method of application.

**Limitation of Remedies and Liability**

If the 3M product is proved to be defective, THE EXCLUSIVE REMEDY, AT 3M’S OPTION, SHALL BE TO REFUND THE PURCHASE PRICE OF OR TO REPAIR OR REPLACE THE DEFECTIVE 3M PRODUCT. 3M shall not otherwise be liable for loss or damages, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including, but not limited to, contract, negligence, warranty, or strict liability.
